

Prismatic Powders™ Custom Color Matching Services

Our color matching services start with an archive search. We have over 6,500 color and texture combinations in our inventory to choose from. We will try and find a match to your sample from this archive. There is no charge for this service and requires 5 to 10 business days to complete. For customers that may be looking for a close match this service works well. We will send color swatches to choose from. If one proves suitable all we require is a 5 lb. minimum order.

For customers looking for an extremely close-to-exact match we would proceed from an archive search to a reformulation. A very close color from an archive search may need a moderate formula change to achieve a match. There is a \$100.00 charge for this service with no guarantee of exact matches. We require up to 6 weeks to complete this process. We will send color swatches to choose from. A 5 lb. minimum order is required upon color approval.

Our charge to formulate a custom color is \$200.00 with a 30 lb. minimum order upon color approval. We require up to 8 weeks to complete this process. Unlike paint, the chemistry with powder is very complex, which sometimes does not allow for subtle changes in tone or shade. We offer no guarantee of exact matches. We will send color samples to be approved.

We ship color samples USPS service at no charge. There will be a charge for any upgraded shipping services.

Returns will not be accepted on Custom Color Formulations.

Please call if you have questions that may not have been answered above. Thank you for choosing Prismatic Powders.
